Competent Team Member
Testing and debugging
Critical thinking and problem solving

Experience

Web Development Immersive Student General Assembly

June 2018-September 2018
Washington, D.C.

Understood how to set up a development environment, the fundamentals of programming, and basics with computing, networks, and data structures. Appropriately model my data, develop simple wireframes, and learn to track a collaborative development process using version control. Experienced working with others to develop larger scale applications.

LifeGuard Boro of Seaside Park

May 2015-September 2017
Seaside Park, New Jersey

Completed Seaside Park swim qualification test and certified to use CPR. Watched over public beaches, helped manage public events, and interaction experience with patrons. Experienced working in a unit to work as effective as possible.

Projects

DC Events

August 2018-August 2018

<http://dc-events.surge.sh/>

<https://dc-events-back.herokuapp.com/events>

Application to discover events occurring in the D.C. area. Created with HTML, JavaScript, CSS, MongoDB, Express, Node.js, Materialize, Git, and React. This was a group project and I worked closely with the backend controllers and frontend components. Includes full CRUD capabilities with our event model and CR with our venues model.

Spiphy

July 2018-August 2018

<https://spiphy.herokuapp.com/>

Application to store users gifs. Created with HTML, CSS, Javascript, Express, Git, MongoDB, Node.js, and passport. Includes full CRUD capabilities for my gif model. Features comments and user authentication. I structured my code by following rMVC to seperate my concerns.

Education

Web Development Immersive Student General Assembly

June 2018-September 2018
Washington, D.C.

Highschool Diploma Jackson Liberty High School

September 2014-June 2018
Jackson, New Jersey
